

Top 5 Actions for Condo Owners

#1 Weatherize and electrify your home.

Reduce your energy load and save money ([sustainoakpark.com/weatherization](https://www.sustainoakpark.com/weatherization)). When appliances break, replace them with electric ones. Learn about mini-splits and other heat pump technology: <https://bit.ly/d-eder-blog>.

#2 Switch to solar.

Invest in clean energy, without the panels: citizensutilityboard.org/solar-in-the-community. Or, visit sunroof.withgoogle.com to see if rooftop solar can work.

#3 Convert your lawn to native plants and veggies.

Work with your board to support biodiversity: bit.ly/natural-pledge-op. Consider a rain garden. Grow your own food in containers, your yard or a community garden.

#4 Travel clean.

Use public transit, walk or ride your bike: bit.ly/op-greenways. Or use an e-bike or electric vehicle; ask your board to add charging plugs in your garage.

#5 Compost.

Buildings with less than five units can join the Village's curbside compost program. Or purchase a kitchen compost pail for \$10 at Village Hall, and drop off food scraps at four locations. Learn more at bit.ly/vop-compost.
